

STATEMENT AND ONE-PAGE HANDOUT

DAB ENERGY TRUST

Doubs · Adamstown · Buckeystown — Our Home, Our Coalition

Read at the mic. Leave the handout on the table.

Spoken part aimed at about 90–120 seconds (~250 words).

A. Public statement (read slowly)

Why we're doing this — my wife pulls out of our driveway onto MD 85 with our six-month-old and has to time it like a gap in freeway traffic. That's not a statistic. That's our morning.

MD 85 is Buckeystown Pike—a state highway through the Buckeystown Historic District. Sidewalks broken or missing; highway speeds through a village with aging neighbors. We are Doubs, Adamstown, Buckeystown—Our Home, Our Coalition. Not for city folk up in Frederick changing everything. For people who actually live here.

About twelve hundred census households in Adamstown and Buckeystown, plus Doubs on a published address list. The CDI overlay is mapped. Catellus is planned at two-point-four gigawatts. Construction is underway. It is not paying our electric bills.

No matter who you vote for, data centers are still going to be built here. A campaign promise to "stop" them does not stop steel. What we need is to get what we are due—operator-funded meter credits through a Trust we control. That puts more money in our pockets to protect what's ours. Dividend is the floor; boundary is the wall—three communities only, not Frederick City. And even outside data centers, apartments follow. The boundary helps keep this place beautiful.

We want a DAB ENERGY TRUST—megawatts to our meters, not a tax-rate hike. Proposed floor two hundred fifty a year; proposed cap one thousand a year—credit follows campus load under the dollar-per-megawatt-hour rule, between those rails—not law until you pass it. No new occupancy if the Trust is unpaid.

Not a lawsuit. Not a protest. Not a political campaign. Neighbors with a plan. I'm a working mechanic—I fix what's broken. Busy with my newborn; still making a few minutes for this.

Doubs, Adamstown, Buckeystown first. That is the ask.

B. One-page handout (print two-sided with Document 1 cover)

DAB ENERGY TRUST

Doubs · Adamstown · Buckeystown — Our Home, Our Coalition

Campus power grows → credit on our meters. Paid by operators, not our tax rate. Money in our pockets; boundary around our home. Exclusive by design—Doubs, Adamstown, Buckeystown only.

Who | Residential meters in Adamstown CDP, Buckeystown CDP, or on the published Doubs address list (Doubs is a hamlet, not a Census CDP). Not ZIP-locked.

How many | Adamstown 710 + Buckeystown 499 = 1,209 Census households. No invented Doubs count—Doubs joins via the published list.

Campus | Catellus / Quantum · planned 2.4 GW · ~2,100 acres (CDI overlay ≈ 2,614.9 acres) · construction underway · Aligned ~264 MW / IAD-04 ~72 MW

County collected | ≈ \$53M Quantum-related recordation through 2025 YTD (HR&A); not a local meter credit. "\$110M" Catellus package rejected Sept. 14, 2026; new applications paused through July 1, 2027; vested work continues.

Proposed floor / cap | \$250 / \$1,000 per meter per year — \$1/MWh between floor and cap — proposed ordinance, NOT enacted law

Three tools | A Trust · C public infrastructure lease · D residual / state equity bill

Boundary & board | Expansion only by board vote + new ordinance + elder consult (ten neighbors 65+ with 10+ years here—advisory, not a veto). Board: five seats; each town ≥1; default 2/2/1.

Elections sketch | Weekend town hall; preferred location Adamstown Park or Buckeystown Park. Proof: license, utility bill, or lease.

Candidate yes / no

I will put a DAB ENERGY TRUST dividend—megawatts to meters in Adamstown CDP, Buckeystown CDP, and on the Doubs list—ahead of any countywide data-center benefit or zoning freeze, and condition new CDI occupancy and any DRRA on that Trust.

File: Document 1 memo · Document 2 bylaws · Document 3 this handout. Email the Clerk; hand-deliver Winchester Hall; read section A at the next open house.
